

PLASPERTEX PAINT CO LTD

Technical Product Data sheet

03.12

Product Name	Fungicidal wash
Product reference	PP26
Product description	A powerful sodium hypochlorite solution for the removal of organic growth and most staining on masonry and surfaces
Uses	Cleaning of concrete, brick, roof tiles, asbestos cement and most masonry surfaces to remove organic growth and staining. Ideal for use in surface preparation prior to application of coatings
Pack sizes availability	25 litres
Colour range	N/A
Specific gravity	Approx 1.2
Flash point	Non flammable
Recommended Spreading rate	Approx. 6m ² /litre depending on surface texture
Solids content	Approx 10% sodium hypochlorite
Drying time	Allow approximately 24 hours before thoroughly rinsing surface with clean water. Any residual loosened materials should be scrubbed away or high pressure cleaned
Over-coating time	Rinsed surfaces must be completely dry before applying coatings.
Minimum application temperature	Air and surface temperature should be 5°C and rising. Do not apply during damp or frosty weather or when rain is imminent
Recommended dry film thickness	n/a
Method of application	Apply using synthetic brush or plastic watering can with fine rose.
Preparation	Remove heavy organic growth and any loose material using a stiff bristled brush, scraping or high pressure washing. Protect metal surfaces and plants from splashes or run-off.
Storage life	Min. 6 months in original sealed containers. Protect from frost and direct heat
Thinning/cleaning	Dilution not normally required. Use up to 4 parts clean water where weaker solutions are required. Wash equipment with clean water immediately after use with water
Safety precautions	Refer to the safety data sheet before use
Volatile organic content (voc)	N/A
Disposal	As supplied or containing liquid product – hazardous waste code 16.09.04 sodium hypochlorite solution. Used containers drained/thoroughly rinsed out with clean water: categorised as non-hazardous with waste code 15 01 02 (plastic package)
